

# Zesumme renovéieren

Driving energy-efficient renovation forward

## How can you find out the cost of insulation?

Ask for a quote from a specialist company. Below you will find a summary of the requirements that your contractor must meet in its offer to ensure you are eligible for Klimabonus state subsidies.

### Controlled mechanical ventilation system eligible for Klimabonus

Minimum planned surface area\* to be ventilated  $\geq 90\%$

\*Energy reference area

## Requirements

- The efficiency of the heat recovery system must be  $\geq 80\%$ .
- The “Blower Door” test (air leakage test) must be performed after the system is installed. The test result must be  $\leq 2.0$  l/h.
- The electrical power input may not exceed  $0.40$  W/(m<sup>3</sup>/h).
- At least 90% of the energy reference area has to be mechanically ventilated.

## Additional requirements to qualify for Klimabonus state subsidies

Before the renovation work can be carried out, the Environmental Agency must give its "Agreement in principle"

- on the basis of energy-efficiency recommendations by a certified energy advisor, or
- for a single construction element, based on support from a certified energy advisor or an approved craftsman.

## Good to know

### Additional bonus to Klimabonus subsidies: greatly reduced VAT rate of 3%

For renovation work, you are charged a reduced VAT rate of 3% instead of the usual 16%, up to a total tax reduction amount of €50,000. The contractor carrying out the work applies the extremely reduced rate directly to construction or renovation work.

The residential building must be older than 10 years.
